

TRAINING YOUR VALUES

TRAINING FOR OPERATION AND MAINTENANCE
OF SVT MARINE LOADING ARMS

Theoretical and practical seminar for operation and maintenance of SVT Marine loading arms at the SVT site in Schwelm, Germany.

The training contains all topics and activities according to the SVT Installation, Operating and Maintenance Manual (IOM).

Practical part takes place on a full-equipped Marine loading arm located on a training area at the SVT site. This also includes instruction into the hydraulic- / electrical control system, troubleshooting and the regular required scope of work.

Refers to the SIGTTO/OCIMF guidelines for maintenance and inspection.

After completing the seminar, each participant receives the "Trained Person" certificate and can be authorised as a "Qualified Person" to perform work according to the IOM with SVT Marine loading arms.
